MEMORANDUM FOR OFFICE OF THE UNDER SECRETARY OF DEFENSE
(ACQUISITION, TECHNOLOGY AND LOGISTICS)

SUBJECT: Announcement of the organizational structure of the AT&L offices
supporting Business Transformation

The Under Secretary for Defense, Acquisition Technology and Logistics (AT&L) recently announced the realignment of AT&L offices supporting Business Transformation. This memorandum describes the organizational structure of the new realignment and includes the organization chart. A separate memorandum will be issued describing the new organizational structure of the Business Management Systems Integration (BMSI) office that has recently been transferred into AT&L from the Comptroller.

Defense Procurement and Acquisition Policy, E-Business (DPAP-EB), (Acquisition Domain), and Logistics Systems Management (LSM), (Logistics Domain) have been consolidated into a single Directorate that will support all of the existing acquisition and logistics roles and responsibilities previously managed by the two separate business domains. This new organization will be directed by Mr. Mark Krzysko and designated Supply Chain Systems Transformation Directorate (SCST). The primary objective of this new directorate will be to transform the supply chain business systems of the Department to support the warfighter.

The SCST Directorate will be responsible for ensuring that DoD Enterprise Business Capabilities are integrated. The Directorate will align business capabilities to DoD Goals, allocate resources, and oversee policy in support of the following Business Mission Areas (BMA); Weapon System Lifecycle Management (WSLCM) and Material Supply & Service Management (MS&SM). Additionally, SCST will support the AT&L Investment Review Board for the BMAs described above. SCST will be comprised of two offices; Business Mission Areas Coordination (BMAC), and Business Systems Technical Support (BSTS).

The BMAC will be responsible for managing the requirements of the functional communities. This will be accomplished by establishing and maintaining strong collaborative relationships with external and internal stakeholders. These offices will engage the Joint Staff, AT&L Business Transformation Office (BTO) military services,

Defense Agencies and Field Offices and relevant program stakeholders to decrease bureaucracy, remove impediments, and increase accountability. .

The Business Systems Technical Support (BSTS) office will provide matrixed technical, functional and operational support to the Acquisition, Procurement, and Logistics Capabilities offices described above using Subject Matter Experts (SMEs).

In addition to the SCST Directorate two new offices have been created to address emergent supply chain process and materiel issues across the department and to ensure the successful adoption of Enterprise Resource Planning (ERP) solutions with minimum extensions or enhancements across the department.

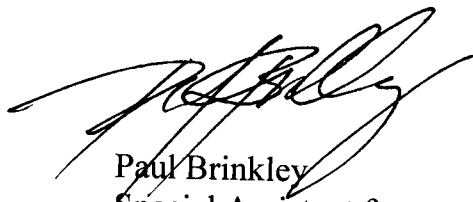

The two offices are:

- The Business Systems Response Office (BSRO).

The primary purpose of this new office will be to focus necessary resources on urgent materiel business systems issues that impact the warfighting mission and can be addressed quickly via existing DoD-wide systems capabilities. This new office will be lead by Mr. Robert Love to coordinate issues using existing staff from within AT&L, the Defense Logistics Agency (DLA) and United States Transportation Command (USTRANSCOM). .

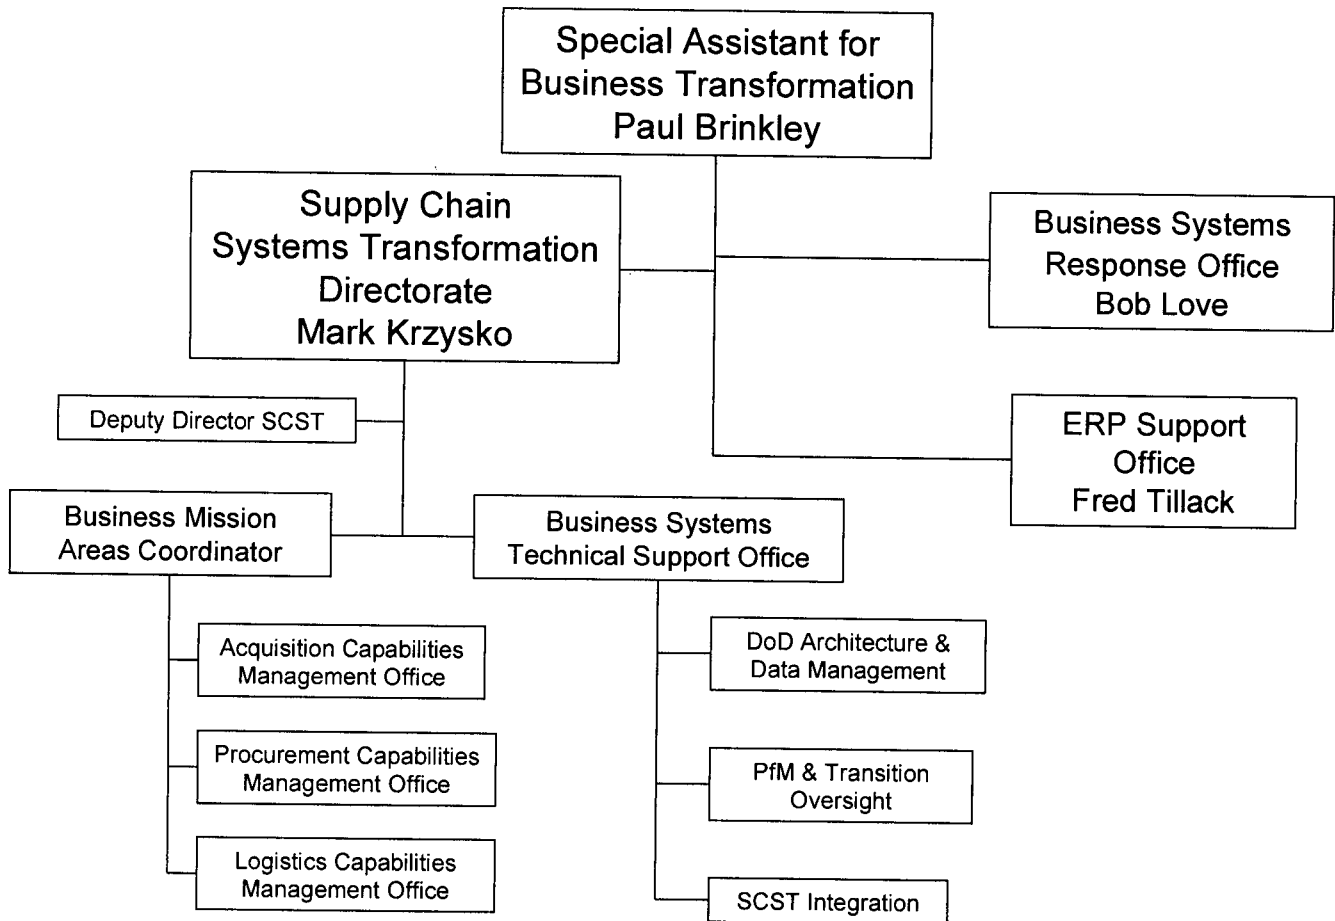

- The Enterprise Resource Planning (ERP) Support Office (ERPSO)

The primary focus of this office will be to collaborate with service transformation leaders to define timeframes for component ERP system compliance with DoD enterprise requirements, encourage best practices and to resolve associated issues. This new office will be comprised of ERP subject matter experts with financial and materiel management experience. Mr. Fred Tillack will create and lead this effort..

Paul Brinkley
Special Assistant for
Business Transformation
